PROTECTION SERVICE FOR BUSINESS

Protection Service for Business is the best, most comprehensive endpoint protection package on the market, designed from the ground up to solve your challenging business security needs.

It protects all your endpoints, from Windows and Mac to mobile devices, against threats like ransomware, data breaches and 0-day attacks, without requiring significant maintenance or management overhead.

Protection Service for Business is the only unified multi-endpoint security solution that comes with integrated Patch Management, Mobile Device Management, and a Password Manager.

We are proven to provide superior and more consistent protection than our competitors, as verified by independent security experts. Thanks to our pioneering security technologies, such as real-time threat intelligence and advanced machine learning algorithms, we are always one step ahead of the attackers.

MOBILES

Protection Service for Business gives you an easy way to secure and control your mobile devices, both iOS and Android, wherever they are. You get everything you need in one package: mobile device management, anti-malware, and VPN.

Supported OS:
iOS 9.x and later
Android 4.0.3 and later

Mobile Device Management
Allows you to configure and enforce passcode policies, and remotely lock or wipe lost or stolen devices.

Mobile VPN
Automatically encrypts (VPN) all traffic between mobile devices and a selected F-Secure service node, allowing safe use of public Wi-Fi and mobile networks.

Lightweight Client
Heavy security functions are in the cloud, ensuring minimal impact on mobile performance and battery life.

Ultralight Anti-malware
When the VPN is active, our service node protects the phones against malware and malicious content. Android APK packages are also scanned locally.

Security Cloud
Our threat analysis and response systems provide our clients with real-time threat intelligence, allowing them to identify and respond to new threats as they emerge.

Web Protection
Prevents users from accessing malicious and phishing websites, even before they are accessed.

Faster Browsing
Increases browsing speed by up to 30% by using traffic compression and blocking resource-intensive online tracking and advertising.

Device Status
Provides detailed information about the devices, such as vulnerable OS versions and whether they are rooted or not.

External MDM
Supports deployment via third party MDM solutions, such as AirWatch, MobileIron, Intune and MaaS360.
